Professionals Hammer the Copper Is Firm at Unchanged Market on Account of Bumper Crops.

CHICAGO, Sept. 5.-Wheat today closed heavy after touching the lowest price of the season, 31c a bushel. An estimate that this year's crop in the United States

that this year's crop in the United States would be 107.000.000 bushels larger than the yield twelve months back was mainty responsible. Final sales ranged from le to 1½ under last night.

According to a crop expert who has frequently anticipated government estimates, the 1912 wheat crop of the country will amount to 728.000.000 bushels. Winter wheat was figured at 103.000.000 bushels and spring wheat at 225.000.000. Free arrivals at northwestern terminals had much effect here, about the only support coming from shorts taking profits in a moderate way on weak spots.

Selling pressure against wheat came chiefly from professional speculators and developed after a firmer start, due to continued wet weather in the Canadian northwest and to further heavy rains in France. Lack of export call more than offset the influence of good flour trade. December swung between 91c and 92%c, with last sales 1½c down at 91½c.

Corn closed at a net decline of 1½c to 1½c

At the close oats were off ic to 1c@èc.

Provisions closed 5c to 32½c lower.
